**Subject:** Subsidence opening backfill work scheduled for Thursday July 17, 2003

Hi Mike,

I wanted to let you and Karl Houskeeper know the scheduled times for the backfill work at the AMR opening at the Centennial Mine. The current plan is have our contractor arrive in Price on Wednesday evening after finishing his work near Blanding, UT.

I plan to come down early Thursday morning. We will be meeting with the Carbon County Road Dept. at their shop (345 N. Carbonville Road) to discuss the use of their borrow pit near the Price airport and to discuss the use of their 950 loader to load the Contractor's truck. The Carbon County Road Dept. has been great to work with. They have agreed to allow us to use fill from their pit and their loader to load the trucks.

Starting on Thursday, we should begin hauling fill material to the Centennial Mine Office parking area where it will be dumped. From the parking area, fill will be hauled cross country to the mine opening via a rubber tired backhoe with a loader bucket.

We calculated about 91 cubic yards of fill material will be required to completely fill the opening and mound the surface to allow for settling.

Attached is a PDF file of a sign I created to use to define the area within the Centennial Mine permit area where the Utah Abandoned Mine Reclamation Program will be conducting work. These signs will be printed on a bright orange paper and laminated. Signs will then be posted around our work area and will act similar to your disturbed area perimeter marker signs required by the Coal Regulatory Program. Instead these signs will define the AMR work area. This should help alleviate any problems between you and your DOGM inspector or others in Title V program. I've used similar signs at other AMR work sites adjacent to or on active coal mine properties.

I think the work should be completed within one day but could possible extend into Friday. We have a seed mix already prepared to revegetate any disturbance we create.

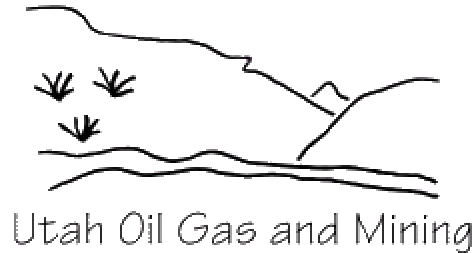

Please let me know if you have any questions or concerns. Let's plan on Thursday July 17, unless you hear otherwise.

Sincerely,  
Ken Wyatt
